

## How the EITC Hits Home

*1 in 7 Iowa Households Value Working Family Credit; \$439 Million to Economy*

Low- and moderate-income working families in Iowa are benefiting in 2014 from an expansion of the state's Earned Income Tax Credit, passed last year. Using an analysis from the Brookings Institution to illustrate where Iowans claim the credit, our map below breaks down the percentage of federal tax filers claiming the EITC in each Iowa House district. Brookings analysis (see page 2) shows 15 percent of Iowa federal income tax filers in 2012 benefited from the credit — about 207,000 households.
